CalTech is a fast growing consulting, network administration, and helpdesk service provider. Our primary strengths are our employees, fun work environment, and most importantly the relationships that we develop with our customers. We promote a "work hard play hard" environment with an extreme focus on customer service. CalTech's pay and benefits package rivals those of a large company, but you get the flexibility and work environment of a small company. With a long term strategic growth plan, structured career path, and performance based pay packages that encourage entrepreneurial spirit; we feel confident that you hold the key to success within our organization. Our need for IT talent is greater than ever before.

Benefits include:

- Health & dental insurance
- Matching retirement plan
- Profit share plan
- Family health club membership
- Paid vacation
- Paid holidays
- Training and certifications

Position Available:

Associate Systems Engineer

Duties include server and network support as well as phone technical support at all levels having a focus on customer service.
